DETAILED ACTION

1. This action is in reply to applicant's correspondence of 24 April 2007.
2. Claims 1-50 are pending for examination.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 drawn to *A method comprising ... receiving a decoded scrambling key ... first cryptographic protocol ... reducing the key size ... descrambling received scrambled content*, classified in class **380**, subclass **43-46**.
 - II. Claims 17-40 drawn to *An integrated circuit comprising [as applied to cryptographic block functionality]*, classified in class **341**, subclass **50**, or class **327** broadly.
 - III. Claims 41-50 drawn to *A set-top box, comprising*, classified in class **725**, subclass **25, 131**, or class **386**, subclass **46, 83, 94**.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, Group II and Group III, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention Group I has separate utility such as *A method comprising ... receiving a decoded scrambling key ... first cryptographic protocol ... reducing the key size ... descrambling received scrambled content*, which **can be used with** *An integrated circuit*

comprising [as applied to cryptographic block functionality], which can be used with A set-top box, comprising, See MPEP § 806.05(d).

Invention Group II has separate utility such as *An integrated circuit comprising [as applied to cryptographic block functionality] which can be used with A method comprising ... receiving a decoded scrambling key ... first cryptographic protocol ... reducing the key size ... descrambling received scrambled content, which can be used with A set-top box, comprising, See MPEP § 806.05(d).*

Invention Group III has separate utility such as *A set-top box, comprising which can be used with A method comprising ... receiving a decoded scrambling key ... first cryptographic protocol ... reducing the key size ... descrambling received scrambled content, which can be used with An integrated circuit comprising [as applied to cryptographic block functionality], See MPEP § 806.05(d).*

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II or Group III is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I or Group III is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2136

Because these inventions are distinct for the reasons given above and the search required for Group I or Group II is not required for Group III, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2136
